Dear Students,

Welcome to Calculus! Attached you will find a summer packet for math reinforcement for the upcoming 2015-2016 school year. This packet should be completed and returned to school on the ***first full day of school***. September is filled with review, but with completion of this packet, the review will come very naturally. The packet will be ***collected*** and ***graded*** as **a large *homework grade*** based on ***completion*** and ***effort***.

To assist in your review and completion of this packet there are videos corresponding to each section of this packet. The videos are linked into this packet using QR codes that look like this: 

In order to view the videos, simply download a QR scanner to your phone, use the scanner to scan the code, and that will directly link you to each video. To see the full collection of videos on your computer, go to: www.vimeo.com/MangieriMath

If you find yourself still confused on certain topics, it is suggested that you search for the topic on one of the following websites:

- ShowMe http://www.showme.com
- Khan Academy: http://www.khanacademy.org/Math
- Math TV: http://www.mathtv.com

We look forward to teaching you and getting to know you next year.

Have a great summer!
