

Pre Calculus Honors

Name: _____

Summer Assignment

Date: _____ Block: _____

Robbinsville School District
Honors PreCalculus Summer Assignment

Welcome to Honors PreCalculus! On the following pages you will find your summer assignment for the upcoming 2018-2019 school year. The summer assignment reviews material that you have learned in Honors Geometry and Honors Algebra 2. You are expected to solve problems #4 – 50 without the use of a calculator. The packet is to be fully completed with work shown; it will be collected for a grade and is due on the **first day of school**. Be prepared for an assessment on this material during the first week of school to determine your readiness for this fast paced and intensive honors level class.

If you need assistance, use your Algebra 2 notes and/or on-line videos to review the material. There are some videos provided. These videos may be accessed on any web-connected device with any web browser. Additionally QR codes are available within the packet, when scanned using a smartphone or tablet these codes will link directly to the corresponding video. Many of the links are from the website: www.showme.com/RHS-Math . On the following page, all of the videos are listed, as well as the questions they pertain to.

Problems	Topic	Link

47,49	Point-Slope Form of Linear Equations	http://www.showme.com/sh/?h=FQGDJSK

Part 1: Graphing Calculator Section: Use a graphing calculator for these problems:
TOPICS: Analyzing Graphs, Solving, Regression

Directions: Graph the following function using your calculator.
 Fill in the characteristics of the graph. Use interval notation where appropriate.

1. $f(x) = x^5 - x^4 - 10x^3 + x^2 + 23x + 14$

Domain: _____

Relative Minimum(s): _____

Range: _____

Relative Maximum(s): _____

Increasing Interval: _____

Zero(s): _____

Decreasing Interval: _____

y-intercept: _____

Constant Interval: _____

2. Solve the following equations using the intersect feature on the calculator. Round to the nearest thousandth.

a) $2x^2 - 5x - 18 = 10$

Solution: _____

b) $\frac{4x-1}{x^2-9} = 4$

Solution: _____

c) $\sqrt{x+7} = x+5$

Solution: _____

3. Input the following data into the calculator.

a) Write the equation of the linear, quadratic, and exponential model. Also state the correlation coefficient:

time (days)	0	1	2	3	4	5
population	30	133	214	337	527	819

Linear: _____

r^2 : _____

Quadratic: _____

r^2 : _____

Exponential: _____

r^2 : _____

b) Which model fits the data best? Explain. Use the best fitting model to find the population after 7 days:

Part 2: Non-Calculator Section: These topics will arise on the non-calculator sections of upcoming tests and quizzes throughout the year. Please complete these problems without the use of any calculator. All work must be shown in order to receive credit.

TOPIC: GRAPHS AND PARENT GRAPHS

Directions: Graph the following piecewise functions and determine the requested properties. Use interval notation where appropriate.

$$4. f(x) = \begin{cases} 3x + 2 & x < -2 \\ x^2 + 1 & -2 \leq x < 1 \\ 6 & x \geq 1 \end{cases}$$

Domain: _____

Range: _____

Increasing: _____

Decreasing: _____

Constant: _____

$f(1) =$ _____

For what value of x is $f(x) = -7$? _____

Directions: Given the graph determine the corresponding piecewise functions and determine the requested properties. Use interval notation where appropriate.

5. Piecewise equations:

Restrictions:

$$f(x) = \left\{ \right.$$

Domain: _____

Range: _____

Increasing: _____

Decreasing: _____

Constant: _____

$f(-2) =$ _____

For # 6 – 9 Directions: Describe the parent function and transformations. Then, sketch the transformation. Write the domain and range using interval notation.

6. Equation: $f(x) = -2|x - 3| + 4$

Parent: _____

Description: _____

Domain: _____

Range: _____

7. Equation: $g(x) = \left(\frac{1}{3}(x + 2)\right)^2 - 1$

Parent: _____

Description: _____

Domain: _____

Range: _____

8. Equation: $h(x) = -\sqrt{2(x - 1)}$

Parent: _____

Description: _____

Domain: _____

Range: _____

9. Equation: $k(x) = \frac{1}{x+5} + 3$

Parent: _____

Description: _____

Domain: _____

Range: _____

TOPIC: Simplifying Radicals and Rational Expressions

Directions: For each problem, completely simplify the expression.

Remember to show all work and write your final answer in exact form on the line provided. Rationalize denominators.

10. $\sqrt{150}$ 10. _____

11. $\frac{4}{\sqrt{80}}$ 11. _____

12. $\sqrt[4]{32x^{12}y^8} \cdot \sqrt[4]{324y^5}$ 12. _____

13. $(2\sqrt{21})(3\sqrt{15})$ 13. _____

14. $\sqrt{\frac{4}{72}}$ 14. _____

15. $\sqrt[3]{-250x^{20}}$ 15. _____

16. $3\sqrt{200} + 2\sqrt{8}$ 16. _____

17. $\frac{6+\sqrt{3}}{5-\sqrt{3}}$ 17. _____

18. $\sqrt{-500}$

18. _____

19. $(3 + 2i) + (5 + 7i)$

19. _____

20. $(-2 + \sqrt{-9})(6 + \sqrt{-25})$

20. _____

21.
$$\frac{\frac{x}{x-1} + 1}{\frac{x-2}{x}}$$

21. _____

22.
$$\frac{x + \frac{2}{x+1}}{x - \frac{3}{x-2}}$$

22. _____

For #23 simplify, remember all exponents should be positive. Keep them in rational form.

23.
$$\frac{100y^3\sqrt{z^3}w^{-1}}{5\sqrt{yz^{-2}w^{-3}}}$$

23. _____

TOPIC: Functions, Combinations of Functions, Compositions of Functions, Inverse Functions

24. Given $g(n) = -3(n - 4)^2 - n$ and $h(n) = n^{\frac{4}{3}} + n$ determine the following. Write your final answer on the line provided.

a) $h(-8)$ 24a. _____

b) $g(h(27))$ 24b. _____

c) $g(n + 5)$ 24c. _____

25 – 27. For each pair of functions, algebraically determine $(f + g)(x)$, $(f - g)(x)$, $(fg)(x)$, $\left(\frac{f}{g}\right)(x)$, $(f \circ g)(x)$, and $(g(f(x)))$. Write your final answer for each on the line provided. State the appropriate domain if it is not $(-\infty, \infty)$.

25. $f(x) = 4x + 3$ and $g(x) = x^2 + 2x + 3$

$(f + g)(x) =$ _____

$(f - g)(x) =$ _____

$(fg)(x) =$ _____

$\left(\frac{f}{g}\right)(x) =$ _____

$(f \circ g)(x) =$ _____

$(g(f(x))) =$ _____

26. $f(x) = x^2 - 16$ and $g(x) = \sqrt{x}$

$(f + g)(x) =$ _____

$(f - g)(x) =$ _____

$(fg)(x) =$ _____

$\left(\frac{f}{g}\right)(x) =$ _____

$(f \circ g)(x) =$ _____

$(g(f(x))) =$ _____

27. $f(x) = \frac{x-4}{x^2-25}$ and $g(x) = \frac{2}{x+1}$

$(f + g)(x) =$ _____

$(f - g)(x) =$ _____

$(fg)(x) =$ _____

$\left(\frac{f}{g}\right)(x) =$ _____

$(f \circ g)(x) =$ _____

$(g(f(x))) =$ _____

Directions: For each problem, find the inverse. Then show $f(f^{-1}(x)) = x$ and $f^{-1}(f(x)) = x$ to prove the functions are inverses.

28. $f(x) = \frac{6}{x+3}$

Inverse:	$f(f^{-1}(x)) = x$	$f^{-1}(f(x)) = x$
----------	--------------------	--------------------

29. $f(x) = \frac{x}{2} - 1$

Inverse:	$f(f^{-1}(x)) = x$	$f^{-1}(f(x)) = x$
----------	--------------------	--------------------

TOPIC: Factoring

Directions. Factor each expression completely. Write your final answer on the line provided.

30. $2x^2 - 3x - 2$

30. _____

31. $8y^3 - 125$

31. _____

32. $6x^2 + 5x - 6$ 32. _____

33. $8x^2 - 4x - 24$ 33. _____

34. $a^2 - 4ab + 4b^2$ 34. _____

35. $36x^2 - 100y^2$ 35. _____

36. $5x^{100} - 80y^{100}$ 36. _____

37. $8(a - 3)^2 - 64(a - 3) + 128$ 37. _____

TOPIC: Solving equations algebraically

Directions: Solve for the zeros of the following functions by solving for x when $y=0$. Show your work algebraically. Keep all solutions in exact form – written as a simplified radical or fraction where appropriate.

38. $y = 3x - 7$ 38. _____

39. $y = x^2 - 14x + 45$ 39. _____

40. $y = x(x + 1)(2x - 5)(x - 3)^2$ 40. _____

41. $y = x^2 - 12$ 41. _____

42. $y = x^4 - 7x^2 + 12$ 42. _____

43. $y = x^5 - 3x^3 + 8x^2 - 24$

43. _____

44. Solve for the zeros using quadratic formula.

44. _____

$$3x^2 + 2x - 5 = 0$$

45. Solve for the zeros by completing the square.

45. _____

$$2x^2 - 10x + 13 = 0$$

TOPIC: Equations of Lines

Directions: Write the equation of the line that meets the criteria given in the form requested. All numbers should be written as fractions where appropriate.

46. The line through $(3, -2)$ with slope $m = \frac{4}{5}$ in slope-intercept form.

46. _____

47. The line through points $(-1, -4)$ and $(3, 2)$ in point-slope form.

47. _____

48. The line through points $(-2, 4)$ with a slope of $m = 0$.

48. _____

49-50. Given $f(-2) = 1$ and $f(-1) = 3$

49. Write the equation of the line between the points in point-slope form.

49. _____

50. Find the exact distance between the two points.

50. _____

Topic: Applications

The height of an object in free fall is given by:

$$s(t) = -\frac{1}{2}gt^2 + v_0t + s_0 \quad \text{where } t \text{ is the time in seconds, } g \approx 32 \text{ ft/sec}^2 \approx 9.8 \text{ m/sec}^2, v_0 = \text{initial velocity and } s_0 = \text{initial height.}$$

51. As a promotion for the Houston Astros downtown ballpark, a competition is held to see who can throw a baseball the highest from the front row of the upper deck of seats, 83 feet above the field. The winner throws the ball with an initial vertical velocity of 92 ft/sec and it lands on the infield grass.

a) What quadratic equation models the above scenario? 51a. _____

b) Find the maximum height of the baseball using a formula. 51b. _____

c) How much time is the ball in the air? Show algebraic work. 51c. _____

52. Consider all rectangles with an area of 182 square feet. Let x be the length of one side of such a rectangle.

a) Express the perimeter as a function of x . 52a. _____

b) Use the graphing calculator to find the dimensions of the rectangle that has the least perimeter. What is the least perimeter? 52b. _____
