Calling all Science Kids for 8 new wonderful lessons!

SYSTEM 4- See the world from a BUG's point of view with an interactive insect lesson, step into the role of a detective and discover how FORENSIC SCIENCE plays an important role in solving crimes, study ROCKS and MINERALS, learn that cooking is all about CHEMISTRY, touch upon ENGINEERING, learn the science behind SPECIAL EFFECTS in movies, explore the scientific principles behind TOY mechanisms, and create your own TORNADO tube and watch the weather whirl!

**No class on Oct.19 & 26, Nov.9 & 23** **\$110.R.E.D./\$125. Non-**

This 8 week clinic is perfect for first time players or other aspiring players. Everyone will improve their game and have fun. Each session combines fundamental skill instruction with organized team competition. Participants will benefit by improving their individual skills such as passing, dribbling, shooting, rebounding, and defense while learning how to work within the framework of a team.

Each session begins with a warm-up of stretching and plyometric exercises followed by a group activity designed to promote leadership and team work. Stations drills are next where small groups of players work with a coach on a specific skill. Stations are both fun and promote skill development. There will be competitions such as passing circle, survivor, knockout, and dribble tag.

**\*No class on Oct.10 & 31** **\$125.R.E.D./\$145. Non-R.E.D.**
